

Categories for the Kingdom of Atenveldt Arts And Sciences Competition

Revised April 2011 CE

PLEASE NOTE: *The Categories and Subcategories for the Atenveldt Kingdom Arts & Sciences Competition go under review and revision every year in order to provide potential entrants with increased opportunity for recognition of individual artistic skills and better feedback from judges, and to provide the Crown with fair means of selecting a well-rounded Arts & Sciences Champion to represent the Kingdom. The following represents the adjusted Categories and Subcategories for the 2010 CE A&S Competition.*

Choices concerning placement of entries should be made depending on which overall aspect(s) of an entry are to be judged. In some cases instructions or suggestions for placement have been put in the Category or Subcategory explanations. In other cases, single items may be placed into alternate categories.

EXAMPLES FOLLOW:

A decorated leather belt, complete with buckle, strap ends, and other attached decorations, would be best placed in “Clothing—Accessories.” Any of the decorative metal elements themselves would be more appropriately placed in “Metalwork,” and the leather belt strip (without buckle or added decorative pieces), if tooled and/or decorated using strictly leatherworking techniques, might be better placed in “Leatherwork.” If the completed belt was placed in “Leatherwork,” only the leatherwork itself would be the focus of judging. If items cannot be disassembled and placed in the different categories, please place the entire entry in the best one single category.

A wooden box, covered with highly tooled and decorated leather and decorated metal overlays and handmade hinges, could easily be entered in the “Leatherwork,” “Woodworking,” “Metalwork,” or “Camping & Homesteading” categories. If the most complex and visible portion was the leatherwork and the rest of the elements were not as well done, Leatherwork might be the category of choice. In “Woodworking,” only the woodwork portion of the box (here mostly structural) would be the focus of judging—this situation might be similar for “Metalwork.” For the finished item (i.e., the box itself including all of the decorative work) to be critiqued, the most appropriate category might be “Camping & Homesteading,” entering the box as a household item.

In some cases, an artisan may produce an item for which there is not an appropriate Category or Subcategory. If known early enough, a request to add or alter Category or Subcategory may be placed with the Kingdom Minister of Arts & Sciences (KMOAS). In all instances, every effort will be made to ensure appropriate feedback concerning each entry to the entrant.

At this point there are 26 main Categories. The total individual Categories and Subcategories into which an entry may be placed numbers 52. The Categories have been modified for the 2010 Competition. In 2009 there was a new Category added entitled “Other.” This Category is established for entries using individual or combinations of artistic techniques resulting in an entry that cannot be placed into and well-judged in any alternate existing Category or Subcategory (e.g., a saddle). **Entries into the “Other” Category must be pre-approved by the Kingdom Minister of Arts & Sciences before Kingdom A&S Competition of that year**, who will make a final determination as to whether the entry cannot be placed into any other main Category or Subcategory. The “Other” Category has been moved to the end of the Category list

If you are unsure which category to place your entry in, the KMoAS, and their staff can give you suggestions but ultimately you have to decide.

Remember subcategories were created to help the KMoAS obtain Judges to judge items with a more specialized knowledge of those items.

Questions concerning placement of entries, the overall Category/Subcategory design, as well as any constructive suggestions, **should be directed to the KMOAS** (*before pre-registration if possible*).
